OBJECTIVE

Aspiring Software Engineer with a BCA from Graphic Era Hill University, currently pursuing an MCA at Graphic Era University, Dehradun. Strong foundation in Full Stack Development, Artificial Intelligence, Machine Learning, and Cloud Computing, with hands-on experience building scalable, real-world applications. Passionate about leveraging technology to solve problems and eager to contribute to innovative engineering teams.

SKILLS

Programming Languages: C, C++, Java, JavaScript, Python
Web Technologies: HTML, CSS, React.js, Node.js
Databases: SQL, MongoDB
Tools & Platforms: Git, GitHub, Postman, Socket.io, Streamlit
Core Concepts: Data Structures, OOP, REST APIs, CRUD Operations, AI and Machine Learning, Generative AI

EDUCATION

Graphic Era University, Dehradun, Uttarakhand 2026 – 2028
Master of Computer Applications (MCA) – Pursuing
Graphic Era Hill University, Dehradun, Uttarakhand 2023 – 2026
Bachelor of Computer Applications (CGPA: 8.38)

EXPERIENCE

AI & Machine Learning Intern (AIML-Intern-Certificate) Dec 2025 – Jan 2026

- Working on applied machine learning concepts using Python
- Performing data preprocessing, model training, and evaluation
- Gaining hands-on exposure to real-world ML workflows

Academic Project Lead – Process Management Tool (Github) Jan 2025 – Jun 2025

- Led a team to develop a real-time process and memory monitoring tool
- Implemented process tracking, control operations, and resource monitoring
- Followed Agile practices including sprint-based development and peer reviews
- Mentored 3 team members in Python coding and debugging

PROJECTS

Real-Time Code Editor (Github) July 2025 – Nov 2025

- Built a multi-user real-time collaborative code editor supporting simultaneous editing by multiple users
- Enabled live, low-latency code synchronization across clients using Socket.io and WebSockets
- Implemented room-based sessions with unique room IDs and real-time user presence indicators
- Added support for multiple programming languages with syntax highlighting
- Technologies: React.js, JavaScript, Node.js, Express.js, Socket.io

Personal Diet Planner (Project-Link) Dec 2025 - Jan 2026

- Developed an interactive health and diet planning web app using Python and Streamlit
- Calculated BMI from user-input height and weight, and classified results into standard categories (underweight, normal, overweight, obese)
- Generated personalized diet and calorie recommendations based on BMI, age, gender, and activity level
- Designed a clean, form-based UI with sliders and input widgets for real-time BMI and recommendation updates
- Used Pandas for structured diet/nutrition data handling and Streamlit components for data visualization

CERTIFICATIONS

- **Machine Learning with Python (Coursera)** – Certificate Link
- **Web Development Internship – NullClass** – Certificate Link
- **TCS iON Career Edge – Young Professional** – Certificate Link
- **Generative AI** – Certificate Link
